In 2015, ELY provided collection relocation services for the Natural History Museum of Los Angeles County's Lando Hall of California History. We fabricated the crates required to move the collection of approximately 150 objects. Our team deinstalled the hall and packed and crated all artifacts, including a globe, compass, millstone, and a bear trap. We worked with a rigging company to move oversized objects, such as a wagon and tracker and securely palletized them for transit and storage.
