ELY provided mountmaking and installation services for the Newseum's temporary exhibit "G-Men and Journalists," which included nearly 200 artifacts. ELY's team created mounts for a wide range of artifacts including, mannequins, guns, and a steel support structure for the trial mock-up of the DC sniper's car. The photographs above show the belongings of Dillinger, including his bulletproof vest, FBI-related pop culture artifacts, a mannequin with body armor, and the grouped mounting of fragments of the Ryder truck from the Oklahoma City bombing.
