From December 2005-March 2008, ELY provided traveling exhibition services for the Benjamin Franklin Tercentenary's international exhibition, Benjamin Franklin: In Search of a Better World, celebrating the life and work of Benjamin Franklin. The 8000 square foot exhibition presented over 250 artifacts and over 40 interactive components in six themed sections. Franklin owned many of the objects, which included rare maps, books, scientific apparatuses, and personal artifacts. ELY managed the logistics of moving and installing the exhibit at five venues across the United States and one in Paris.
